

FUZE Fabric Intake Form

Note: A FUZE Fabric Number will be automatically assigned upon submission. Please complete this form and return it to your FUZE representative or upload via the FUZE Atlas portal.

* = Required field (Optional) = Fill in if known

Section 1: Sample Identification & Fabric Basics

Brand / Company Name * _____ Fabric Name / Style * _____

Contact Name * _____ Customer Code: _____

Contact Email * _____ Factory Code: _____

Phone: _____ Batch / Lot Number: _____

Date Submitted * _____

Quantity * _____ Unit: Meters Yards KG

Quantity Type * Actual (confirmed order) Forecast (projected)
 Development (sample/trial) R&D (research)

Annual Volume Estimate: _____ Unit: Meters Yards KG

Volume Type: Actual Forecast Development R&D

End Use / Product Type * T-shirt Athletic Bedding Medical
 Denim Uniform Outerwear Towel/Terry

Other: _____

Target FUZE Tier: F1 (Full Spectrum) F2 (Advanced) F3 (Core)
 F4 (Essential) Not Sure

Section 2: Yarn & Fiber Composition

Complete up to 4 fiber entries below. Total percentage must equal 100%. *

Common fiber types: Cotton, Polyester, Nylon 6, Nylon 66, Wool, Silk, Acrylic, Viscose/Rayon, Modal, Tencel/Lyocell, Linen, Spandex/Elastane, Polypropylene, Bamboo

#	Fiber Type *	% *	Denier/Count (Optional)	Staple / Filament	Twist (TPI)
1		%		Staple	Filament
2		%		Staple	Filament
3		%		Staple	Filament
4		%		Staple	Filament

Recycled Content: Yes No Percentage: % Type: Certification: GRS OEKO-TEX Other:

Yarn Twist Direction (Optional): S-twist Z-twist Unknown

Section 3: Fabric Construction

Category * Woven Knit Nonwoven

If Woven:

Weave pattern: Plain Twill (2/1, 2/2, 3/1) Satin Jacquard
Dobby Other: _____

Thread count — Warp/cm: _____ Weft/cm: _____

If Knit:

Stitch type: Jersey Rib Interlock Pique Fleece
Jacquard Cable Other: _____

Gauge (needles/inch): _____

Physical Properties:

Weight (GSM) * _____ Width (inches): _____ Thickness (mm): _____

Color * _____ Shrinkage % Length: _____ Shrinkage % Width: _____

Air Permeability (Optional): _____ CFM **Compactness:** Very loose Loose
Normal Compact Very compact

Section 4: Pretreatment History

Complete as much as possible. Pretreatment residues directly affect antimicrobial treatment bonding.

Singeing: Yes No Unknown Type: Flame Hot plate Infrared

Desizing: Yes No Unknown Method: Enzymatic Acid Oxidative

Enzymes: _____

Scouring * Yes No Unknown NaOH: _____ % Temp: _____ °C Time: _____ min

Bleaching: Yes No Unknown Type: H2O2 NaOCl NaClO2

Conc: _____ % Temp: _____ °C

Mercerization: Yes No Unknown NaOH: _____ % Under tension? Yes No

Heat Setting: Yes No Unknown Temp: _____ °C Time: _____ sec/min

Fabric pH After All Pretreatment * _____ (Ideal: 6.0–7.5 for silver nanoparticle adhesion)

Residual Chemicals (Optional): None detected Trace alkali Trace acid

Unknown Wetting agents used: _____

Section 5: Dyeing Details

Fabric Dyed? * Yes No (greige) **Dyeing Stage *** Yarn-dyed Piece-dyed
Garment-dyed Greige Printed

Dye Class * (check all that apply): Reactive Disperse Acid Vat
Sulfur Pigment Direct Natural
Other: _____

If Reactive Dye:

Type: Vinyl sulfone (hot) MCT (cold) DCT (warm)
Fixation temp: _____ °C Alkali used: Na₂CO₃ NaOH Conc: _____ g/L

If Disperse Dye:

Energy level: Low Medium High Carrier used? Yes No
Carrier type: _____ Dyeing temp: _____ °C

If Acid / Vat / Sulfur Dye:

Acid type: _____ Reduction agent: _____
Oxidation agent: _____

Dye Bath Parameters:

Method: Pad Exhaust (batch) Jet Package
Continuous Other: _____
Bath temp: _____ °C Bath pH: _____ Salt conc: _____ g/L Dye conc: _____ % owf
Leveling agents: _____ Dispersing agents: _____
Sequestering agents: _____

Post-Dye Treatments:

Soaping Hot rinse Cold rinse Multiple rinse cycles
Post-dye pH * _____ Drying temp: _____ °C

Section 6: Chemical Finishes

CRITICAL: Chemical finishes directly impact silver nanoparticle bonding and antimicrobial efficacy. Please provide as much detail as possible. Incomplete finish data is the #1 cause of unexpected test anomalies.

SOFTENERS *

Silicone softener applied?	Yes	No	Unknown
Type:	Amino silicone	Macro-emulsion	Micro-emulsion
	Hydrophilic silicone	Polyether-modified	Other: _____
Ionic charge:	Cationic (+)	Anionic (-)	Nonionic
Concentration:	_____ % owf	Product/brand:	Unknown
Non-silicone softener:	Yes	No	Type: Quaternary ammonium (QAC) Imidazoline
		Amine oxide	Other: _____ Conc: _____ % owf
Wax-based softener:	Yes	No	Type: Paraffin Polyethylene Natural wax
		Other: _____	Conc: _____ % owf

WATER REPELLENT *

Applied?	Yes	No	Unknown	Type:	C6 Fluorocarbon	Oil Non-fluoro
		Silicone-based	Wax-based			
Concentration:	_____ % owf	PFOA/PFOS free?	Yes	No	Durability grade:	Temporary Durable
					Very durable	

WICKING / MOISTURE MANAGEMENT *

Applied?	Yes	No	Unknown	Type:	_____	Conc:	_____ % owf
----------	-----	----	---------	-------	-------	-------	-------------

WRINKLE-FREE / EASY CARE *

Applied?	Yes	No	Unknown	Type:	_____	Conc:	_____ % owf
----------	-----	----	---------	-------	-------	-------	-------------

OTHER FINISHES

Anti-pilling:	Yes	No	Type:	_____	Conc:	_____ % owf
Flame retardant:	Yes	No	Type:	_____	Conc:	_____ % owf
UV protection:	Yes	No	Type:	_____	Conc:	_____ % owf
Stain release:	Yes	No	Type:	_____	Conc:	_____ % owf
Anti-static:	Yes	No	Type:	_____	Conc:	_____ % owf
Existing antibacterial:	Yes	No	Type:	_____	Conc:	_____ % owf
Hand-feel modifier:	Yes	No	Type:	_____	Conc:	_____ % owf

Section 7: Additional Notes & Submission

Special requirements or concerns:

Known chemical incompatibilities:

Previous antimicrobial treatment history: None Yes (describe below)

Sample Condition: New/Unused Washed (# washes: _____) Worn/Used Other: _____

Submission

Submission Date * _____ Submitted by (Name) * _____

Title / Role: _____ Company: _____

Signature: _____ Date: _____

How to submit: *Email completed form to your FUZE representative, or upload via FUZE Atlas at /fabrics/intake.
Digital photos of handwritten forms are also accepted.*
